

## Windows of Wonder - Jack

One of my windows of wonder is my television set. As one who was born before TV came in I well remember the early 12" black and white set bringing Queen Elizabeth's coronation into our homes and look at the size and quality of the pictures that we get today.

In recent times we have had front row seats at the Olympic Games, seen the white smoke appear above the Cistine Chapel and the first appearance of Pope Francis, not to mention the way that news from across the world is brought to us daily. This is truly a God given gift through the expertise of the inventors and developers of television.

But television also provides me with a window into the wonder and beauty of nature, the work of our creator God. Thanks to the knowledge and enthusiasm of people like David Attenborough, the presenters of Spring/Autumn Watch, Monty Don and Carol Klein the gardeners and countless others aided by dedicated camera operators we witness the hidden wonders of nature that we could never see otherwise.

I say "thank you Lord for these windows of wonder into the work of your hands, constant reminders to us of how blessed we are to be part of your creation and to live in such a beautiful and wonderful world"

**Jack.**
